

Toolbox: 9 April 2018

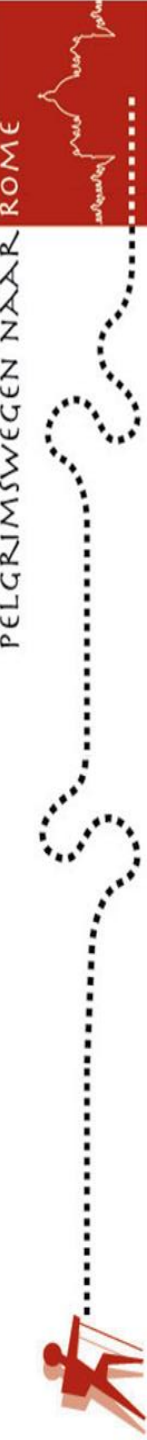

Een toolbox voor wandelen in Italië

- De vereniging Pelgrimswegen naar Rome heeft op haar website een aantal bekende routes naar Rome in Italië uitgewerkt.
- Zie hiervoor de [website](#), daar zijn de Via Francigena, de Franciskaanse route en een paar tussenroutes uitgewerkt.
- Maar er valt in Italië nog zoveel meer te wandelen, alleen dat vereist wel wat meer eigen initiatief.
- In deze ppt handvatten om zelf meer routes te vinden en te lopen.
- Wat is daar voor nodig: een beetje kennis van Italiaans, geduld om op het internet te zoeken, oefening in gebruik van GPS tracks en vervolgens moed om een avontuur te gaan lopen.

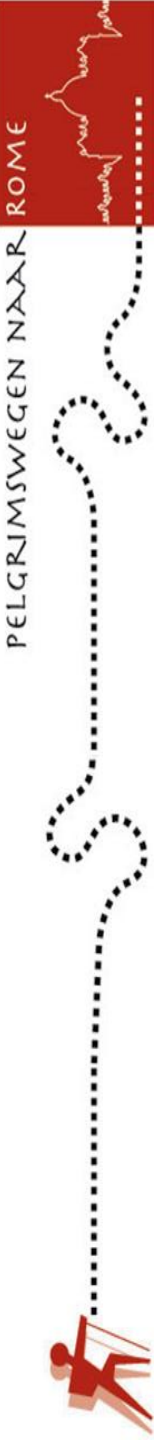

Inhoud

- Hoe kom je aan een wandelroute in Italië op internet
- Voorbeeld 1 : de route San Antonio van Venetië naar La Verna
- Voorbeeld 2 : de Cammino Don Bosco in de buurt van Turijn
- Werken met files in gpx of kml formaat bij bekijken routes
- GPX op je telefoon onderweg

Hoe kom je aan een wandelroute in Italië via internet

- Net als in Nederland worden door vrijwilligers veel wandelroutes uitgezet, vaak over historische paden.
- Ook in Italië wordt er erg veel werk gestopt om dat op internet toegankelijk te maken
- Het wordt ook van overheidswege gestimuleerd, per provincie, regio en landelijk
- Er is echt verrassend veel te vinden

Internet en werkelijk lopen

- Wat je op internet vindt zegt niet altijd dat de route ook veel gebruikt wordt
- Soms lijkt de route vooral een paar maal per jaar door de bevolking te worden gebruikt, en is deze bijna overgroeid
- In elk geval moet je óf een wandelgids vinden, óf een goede gps track hebben met een goede website
- Aan het eind van de ppt meer informatie over onderzoek van de werkelijkheid.
- Voorbeelden: Cammino di San'Antonio en Cammino Don Bosco

Zoek op internet met het Italiaanse woord: cammino cammini via (via is natuurlijk moeilijker)

Via Francigena - sito ufficiale

www.viefrancigene.org/it/ ▼ [Translate this page](#)

L'antica **Via** che nel medioevo univa Canterbury a Roma e ai porti della Puglia è stata riscoperta dai moderni viandanti, che si mettono in **cammino** lungo un percorso splendido e sorprendente. CAMMINO DI SANT'ANTONIO

È nato **Il Cammino di Sant'Antonio**, un pellegrinaggio che conta dalle 13 alle 15 tappe a seconda del luogo di partenza e delle varianti possibili (300 km). Si snoda da Venezia/Padova all'Eremo di Montepaolo di Dovadola (Forlì Cesena). Da qui parte il Cammino di Assisi, ricongiungendo in questo modo sant'Antonio a san Francesco, Padova ad Assisi.

Viene rilasciata la credenziale dalla Basilica del Santo di Padova, si passa per Monselice, Rovigo, Ferrara, Bologna, i Parchi dei Gessi Bolognesi e dei Calanchi dell'Abbadessa e della Vena del Gesso Romagnola fino ad arrivare a Montepaolo dove viene rilasciata l'Assidua. Il percorso è segnato da frecce indicative. Vi sono rifugi e locali convenzionati lungo tutto il cammino. Sta per essere pubblicata anche la guida cartacea.

Grote website, alleen Italiaans, dit is echter nog de website van [Retecamminifrancigeni.eu](http://www.retecamminifrancigeni.eu) Er staat een link naar de website van de [Camminodisantantonio](http://www.ilcamminodisantantonio.org)

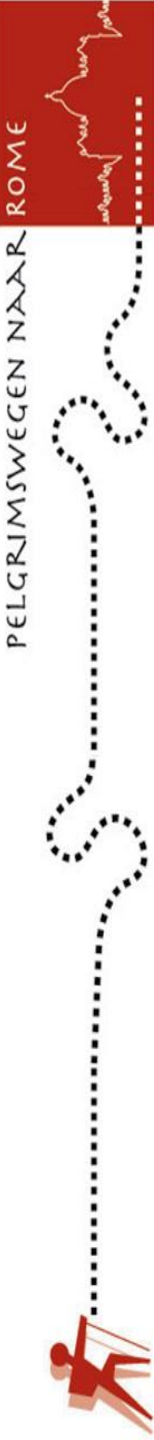

Eerste doorverwijzing werkt niet <http://www.retecamminifrancigeni.eu/admin/www.ilcamminodisantantonio.org>
Ver wijder eerste deel dus: www.ilcamminodisantantonio.org

The screenshot shows a web browser with multiple tabs. The active tab is titled 'IL CAMMINO DI SANT'ANTONIO - ...'. The address bar shows the URL 'www.ilcamminodisantantonio.org/ita/pagina.asp?id=61#mappa'. The website has a header with a religious image and a navigation menu on the left. The menu includes options like 'Home', 'Significato', 'Ultimo cammino', 'Presentazione', 'La storia', 'Il tracciato', 'Le tappe' (which is highlighted), 'I santuari', 'Le credenziali', 'Cammino notturno', 'Photogallery', 'Lungo cammino', 'Foto', 'Meteo', 'Testimonianze', and 'Link amici'. The main content area is titled 'IL CAMMINO DI SANT'ANTONIO - L'Ultimo cammino - Le tappe'. It contains a section 'LE TAPPE DELL'ULTIMO CAMMINO DI S. ANTONIO' with a list of bullet points: 'L'Ultimo Cammino di S. Antonio da Camposampiero a Padova è lungo 23,7 km.', 'Durata media di percorrenza : 6/7 ore.', and 'Collegamento alla mappa dettagliata'. Below this is a paragraph about the starting point, 'Il punto di partenza', which is the area between the 'Santuario del Noce' and the 'Santuario della Visione a Camposampiero'. To the right of the text is a photograph of a church, identified by the caption 'Santuario del Noce'.

TAPPA 1

POSSIBILE ALTERNATIVA ATTRAVERSO I COLLI EUGANEI (SDOPPIAMENTO TAPPA)

TAPPA 1.1

PADOVA – TORREGLIA

Distanza di percorrenza: 25 km
Difficoltà: ***

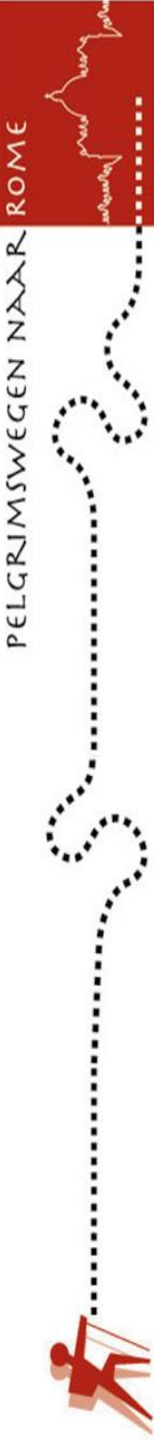

La tappa parte dalla **Basilica di Sant'Antonio**. Prima di lasciare questo venerabile luogo, si può visitare l'**Oratorio di S. Giorgio** e la **Scuola del Santo** con notevolissimi affreschi. Tenendosi l'ingresso della Basilica alle spalle, si imbecca l'immediata via Orto Botanico a sinistra. La si percorre, superando il Ponte del Maglio in pietra. Alla curva si può visitare il famoso **orto botanico**, fondato nel 1545 e considerato il più antico Orto Botanico Universitario del mondo (biglietto d'ingresso ridottissimo per i pellegrini: 1 euro **190 metri da inizio tappa**). Si continua in via Donatello, quindi si svolta a sinistra in via A. Briosco, la si percorre tutta, immettendosi nell'imponente **Prato della Valle** (**490 metri da inizio tappa**), una delle più grandiose piazze del continente (mq 88.620), solcata dall'ellisse della canalizzazione che iscrive l'*isola Memmia* e sulla quale affacciano 78 statue di personaggi legati a Padova e all'Università (al centro fontanelle di acqua potabile).

Visibile sulla sinistra è la **Basilica di Santa Giustina** (1532-1579), benedettina, che ha cambiato aspetto svariate volte, senza tuttavia che si riuscisse a compiere la facciata. Secondo la tradizione, nel 304 fu martirizzata di spada Santa Giustina, aristocratica romana: sul luogo della tomba nel 530 d.C. furono eretti in suo onore la basilica e l'antichissimo sacello (VI secolo); da ammirare anche elementi dell'antica basilica romanica (XII-XIII sec.) e il pozzo dei martiri.

Si attraversa Prato della Valle in direzione sud-ovest. Quindi, all'incrocio semaforico (**835 metri**), si attraversa la strada

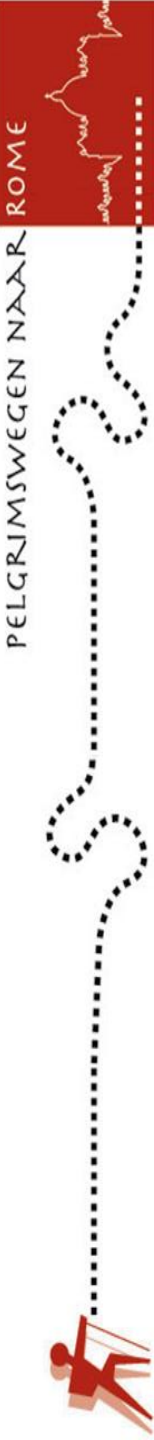

En dan vind je onder andere een beschrijving van een alternatieve route.

Deze route van Venetië en Padua naar La Verna is zeker goed te volgen, ook voor mensen die niet heel veel zoekervaring hebben.

De Cammino Don Bosco in de buurt van Turijn

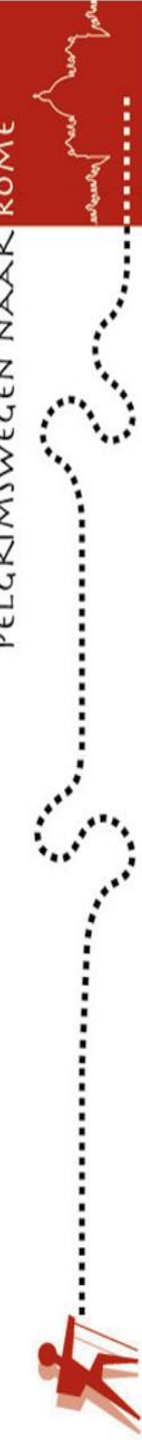

- Stel je wilt je wandeling over Turijn lopen en wilt vandaar in de richting van de Via Francigena.
- En je wilt zo snel mogelijk de drukte van de grote stad uit.
- Je typt weer Cammino en daarbij voeg je Turijn of **Cammino Torino**
- Dan vind je om te beginnen een aantal wandelingen in de alpen, maar ook: **il Cammino di Don Bosco**.
- Als je daarop klikt kom je op een website met een drietal wandeling ten oosten van Turijn:

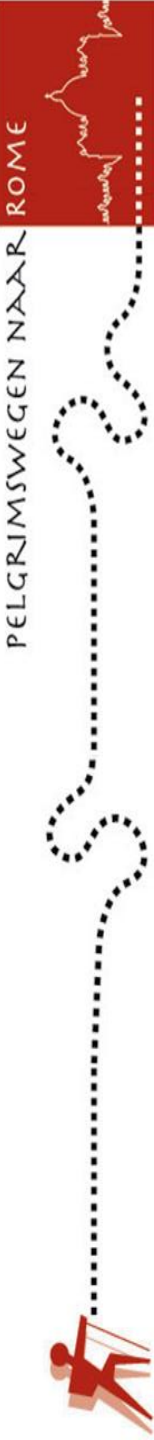

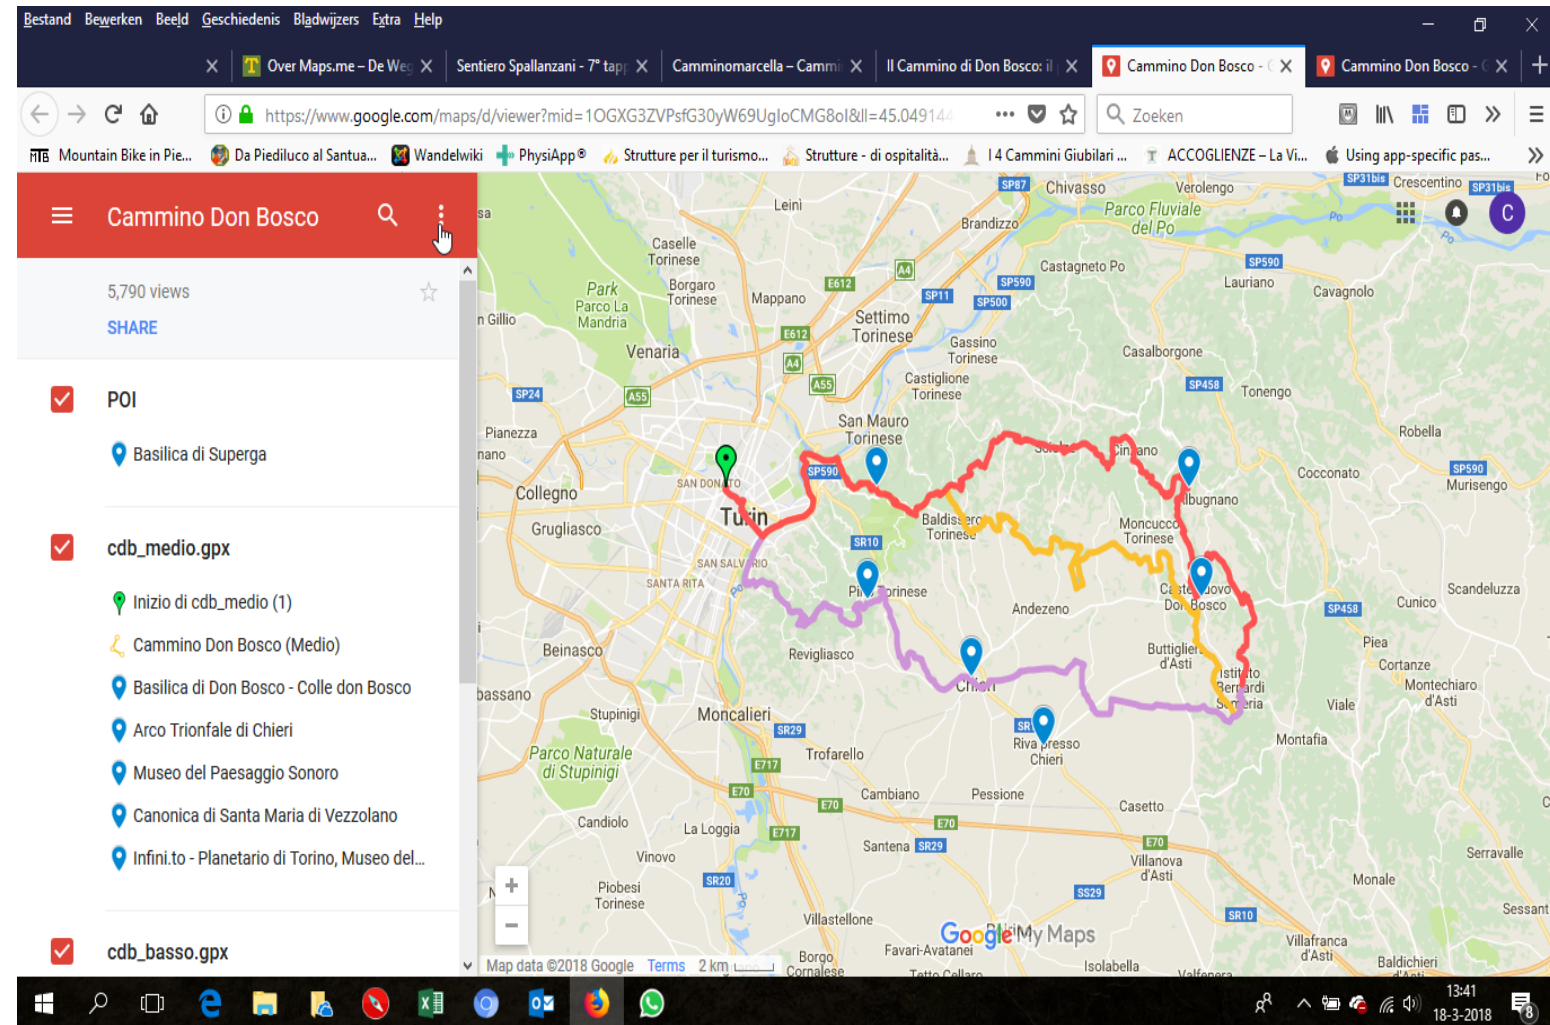

Je bent oa op zoek naar een GPX track, dus:

The screenshot shows a web browser window with the URL www.camminodonbosco.it/it/il-percorso/. The page has a green header with the title "Il percorso". Below the header is a navigation menu with links: IL PERCORSO, CARTINA, DON BOSCO, OSPITALITÀ, TERRITORIO, EVENTI, MEDIA, and CONTATTI. The main content area displays a map of the Turin region, Italy, with a red line indicating the route of the Cammino Don Bosco. The map includes labels for various locations such as Cirié, Volpiano, Chivasso, Torrazza Piemonte, Crescentino, Gabiano, Camir, Cavagnolo, Cocconato, Moncalvo, Tonco, Castell'Alfero, Viale, Piea, Casale Monferrato, Don Bosco, Cambiano, Moncalieri, Rivoli, Venaria, and Settimo Torinese. A hand icon is positioned over the map, pointing to a specific location. A red text box on the right side of the map says "Druk op de plaats waar het handje staat !!". The Windows taskbar at the bottom shows the date and time as 13:41 on 18-3-2018.

Druk op de plaats waar het handje staat !!

Je ziet dat er niet alleen een kaart op de website staat, maar dat er ook gpx informatie in besloten is.
Druk weer op de plaats waar het handje staat, bij de drie puntjes.

The screenshot shows a Google Maps interface with a red line representing the 'Cammino Don Bosco' route. A context menu is open over the 'Download KML' option. The left sidebar shows the route details, including 'POI' and 'cdb_medio.gpx'. The map shows the area around Turin, Italy, with various landmarks and roads visible. The bottom of the screen shows the Windows taskbar with various application icons.

Nu zie je dat je een kml file kan downloaden, dat is een file met routeinformatie die tot gpx kan worden omgevormd.
Op ok drukken voor downloaden.

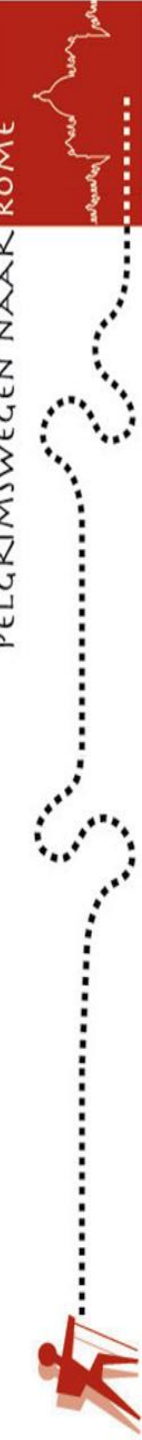

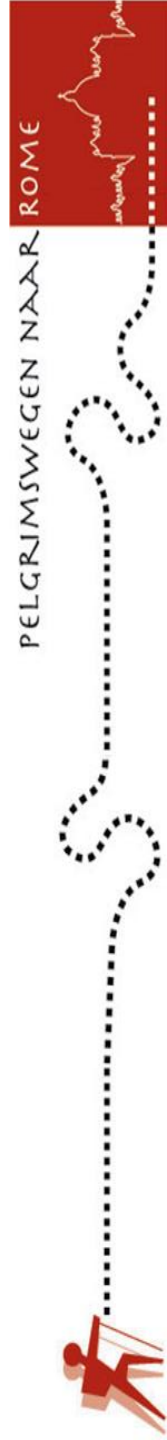

Men krijgt een KML bestand.

Wat kun je verder met deze website van Don Bosco

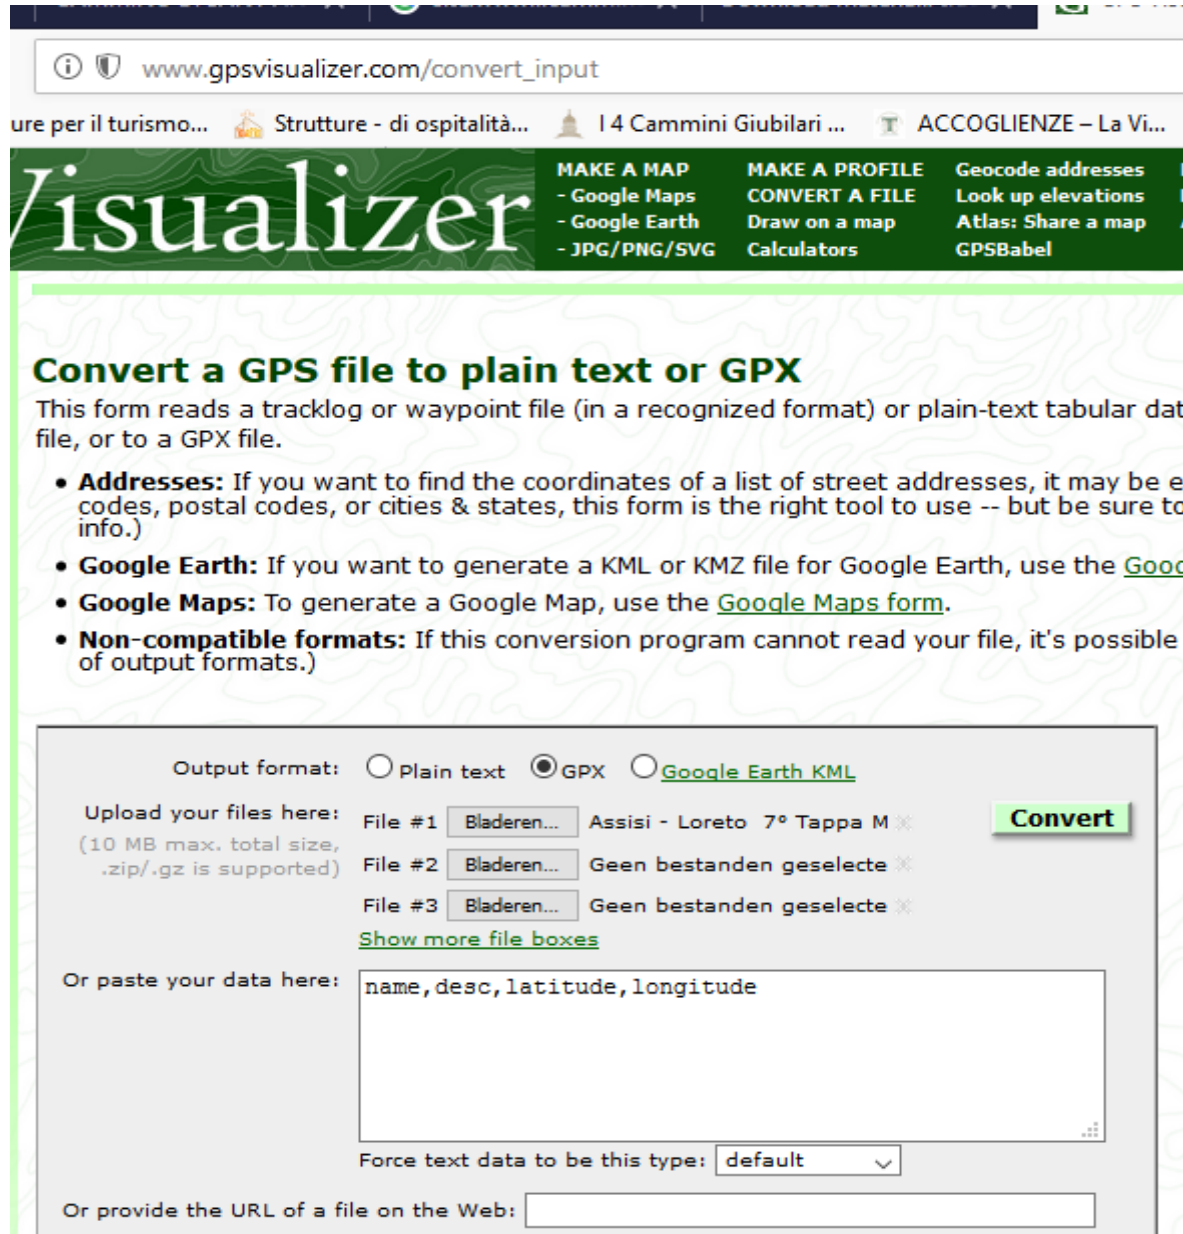

- Er staat achtergrond informatie over Don Bosco op
- Er is een pagina Territorio, die vertelt wat je waar moet eten
- Maar belangrijker: er is een pagina Ospitalità, waar een aantal overnachtingsadressen gegeven wordt.
- En er staan twee mooie [video's](#) op, als je ze ziet denk je: mooi werk!
- Kortom: er is best veel werk aan besteed om het toegankelijk te maken.
- (als je een beetje Italiaans begrijpt.)
- Nu moet je alleen nog kiezen want er zijn 3 varianten

Werken met GPX en KML bij het bekijken,
samenvoegen, splitsen en maken van routes

Als het allen kml of alleen gpx is en je de tegengestelde nodig ga dan naar:

The screenshot shows the website www.gpsvisualizer.com/convert_input. The page has a green header with the word "visualizer" in white. Below the header, there are three columns of links: "MAKE A MAP" (Google Maps, Google Earth, JPG/PNG/SVG), "MAKE A PROFILE" (CONVERT A FILE, Draw on a map, Calculators), and "Geocode addresses" (Look up elevations, Atlas: Share a map, GPSTabel). The main content area is titled "Convert a GPS file to plain text or GPX". It explains that the form reads a tracklog or waypoint file and converts it to plain-text tabular data, GPX, or Google Earth KML. There are three bullet points: "Addresses" (for finding coordinates), "Google Earth" (for generating KML/KMZ), and "Google Maps" (for generating Google Maps). Below this, there are three radio buttons for "Output format": "Plain text", "GPX" (selected), and "Google Earth KML". There are three file upload boxes labeled "File #1", "File #2", and "File #3". File #1 contains "Assisi - Loreto 7° Tappa M". File #2 and #3 are empty. A "Convert" button is next to the file boxes. Below the file boxes is a link "Show more file boxes". There is a text area for "Or paste your data here:" with the placeholder text "name,desc,latitude,longitude". Below the text area is a dropdown menu for "Force text data to be this type:" with "default" selected. At the bottom, there is a text input field for "Or provide the URL of a file on the Web:".

Output format: ☐ Plain text ☒ GPX ☐ [Google Earth KML](#)

Upload your files here:
(10 MB max. total size, .zip/.gz is supported)

File #1 Assisi - Loreto 7° Tappa M

File #2 Geen bestanden geselecte

File #3 Geen bestanden geselecte

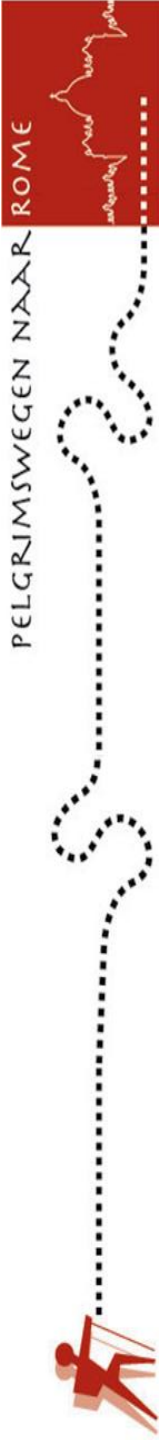

[Show more file boxes](#)

Or paste your data here:

name,desc,latitude,longitude

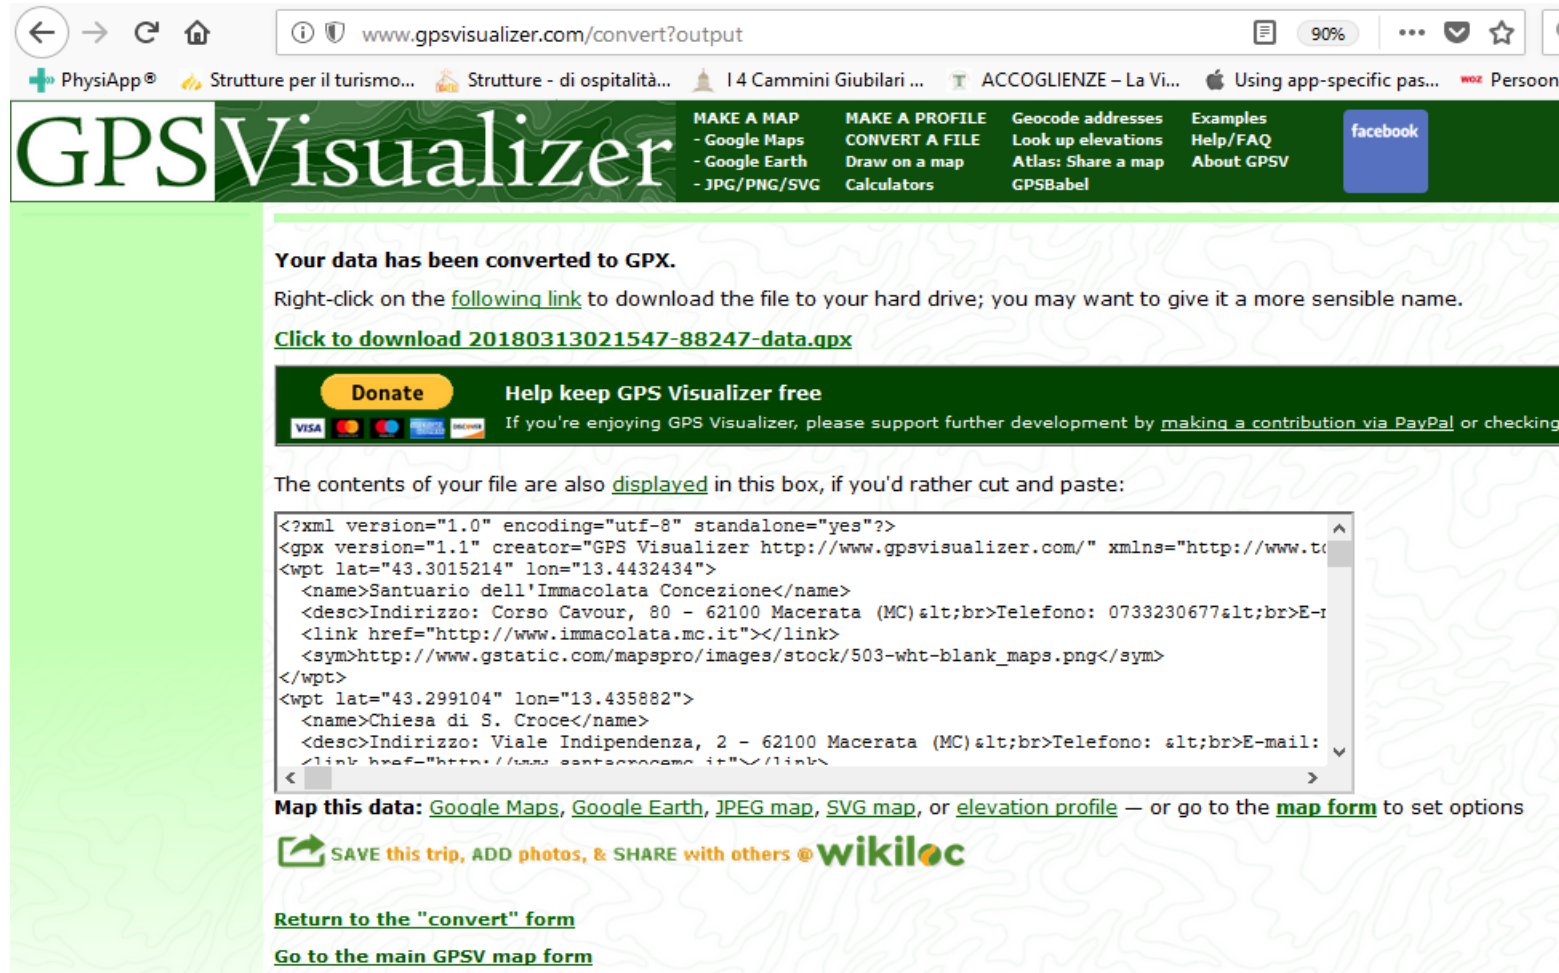

Force text data to be this type:

Or provide the URL of a file on the Web:

Als het een kml file is, klik dan GPX punt aan. Laad file dmv tap bladeren in site.
CONVERT aan klikken.

Volgt:

The screenshot shows the GPS Visualizer website interface. The browser address bar displays 'www.gpsvisualizer.com/convert?output'. The website header includes navigation links like 'MAKE A MAP', 'MAKE A PROFILE', 'Geocode addresses', and 'Examples'. A green banner states 'Your data has been converted to GPX.' and provides instructions on how to download the file. Below this, there is a 'Donate' button and a section for the file's contents, which is displayed in a text box. The text box shows XML data for two locations: Santuario dell'Immacolata Concezione and Chiesa di S. Croce. At the bottom, there are links to 'Map this data' and 'Return to the "convert" form'.

Van GPX naar KML werkt ook zo.

Soms werkt het niet, werk dan met GPSTools, downloaden en installeren.

A screenshot of a web browser displaying the GPSTools website. The browser's address bar shows 'https://www.gpsbabel.org'. The website has a blue header with the 'GPSTools' logo and the tagline 'Free software for GPS data conversion and transfer.' Below the header is a navigation bar with links for 'Support', 'Downloads', 'Screenshots', 'Capabilities', and 'Documentation'. The main content area features a section titled 'What is GPSTools?' which explains that the software converts waypoints, tracks, and routes between various GPS receivers and mapping programs. It mentions that the software is stable and trusted, having been around since 2001. A 'Free Download' button is visible. Below this, another section titled 'Does it run on my computer?' states that the software runs on Microsoft Windows XP, Vista, Windows 7, Windows 8, and POSIX OSes like Mac OS/X and Linux. The browser's tab bar at the top shows several open tabs, including 'cammino cam...', 'CAMMINO DI SANT...', 'site:www.ilcam...', 'Download materiali...', 'GPS Visualizer: V...', 'GPSTools: conve...', and 'Il Cammino di Sa...'. The browser's taskbar at the bottom shows various application icons.

GPSTools Free software for GPS data conversion and transfer.

Support Downloads Screenshots Capabilities Documentation

What is GPSTools?

GPSTools converts waypoints, tracks, and routes between popular GPS receivers such as Garmin or Magellan and mapping programs like Google Earth. Many GPS receivers and programs are supported. It also has powerful manipulation tools for such data, such as filtering duplicates points or simplifying tracks. It has been used by tens of millions of times since it was first created in 2001, so it's stable and trusted. 

By flattening the Tower of Babel that the authors of various programs for manipulating GPS data have imposed upon us, GPSTools returns to a common standard for exchanging data between the programs and hardware we choose to use.

 **GPSTools**
Free Download 

It contains extensive data manipulation abilities making it a convenient for server-side processing or as a command-line tool.

GPSTools does not convert, transfer, send, or manipulate *maps*. We process data that may (or may not) contain waypoints, tracks, and routes.

Does it run on my computer?

Almost certainly. GPSTools runs on Microsoft Windows XP, Vista, Windows 7 and Windows 8 plus POSIX OSes such as Mac OS/X and Linux.

Het bekijken van GPX file kan GPS editor:

The screenshot shows the homepage of the GPS Track Editor website. The browser address bar displays 'www.gpstrackeditor.com'. The website has a blue header with the 'GPS Track Editor' logo and navigation links: Home, Features, Download, Help, and About. Below the header, there are two images of colorful pushpins and a text box that reads 'GPS tracks as perfect as you wish!'. A large green button with a downward arrow says 'Free Download'. Below this button, it says 'Version 1.15 beta, 7.6 MB | [System requirements](#)'. To the left of the download button, there is a list of features: analyze and clean up your GPS tracks, make a clear structure of track segments, view your trajectory in color, inspect track points, extract parts of a track, save as GPX, NMEA, or CSV file, merge several tracks into one, and generate timestamps. Below the list are links for 'More features' and 'Take a tour'. At the bottom right, there is a screenshot of the GPS Track Editor application interface, showing a map with a track and a table of points.

GPS tracks as perfect as you wish!

Free Download

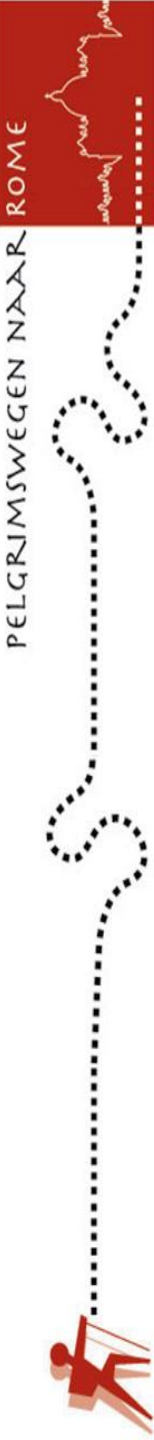

Version 1.15 beta, 7.6 MB | [System requirements](#)

GPS Track Editor is a Windows application to do everything with GPS tracks. With the current version you can:

- analyze and clean up your GPS tracks
- make a clear structure of track segments
- view your trajectory in color
- inspect track points
- extract parts of a track
- save as GPX, NMEA, or CSV file
- merge several tracks into one
- generate timestamps

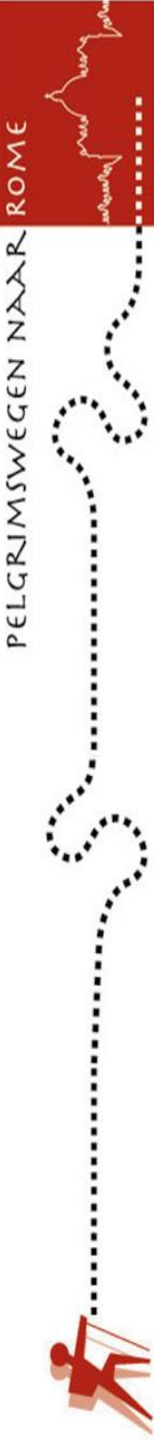

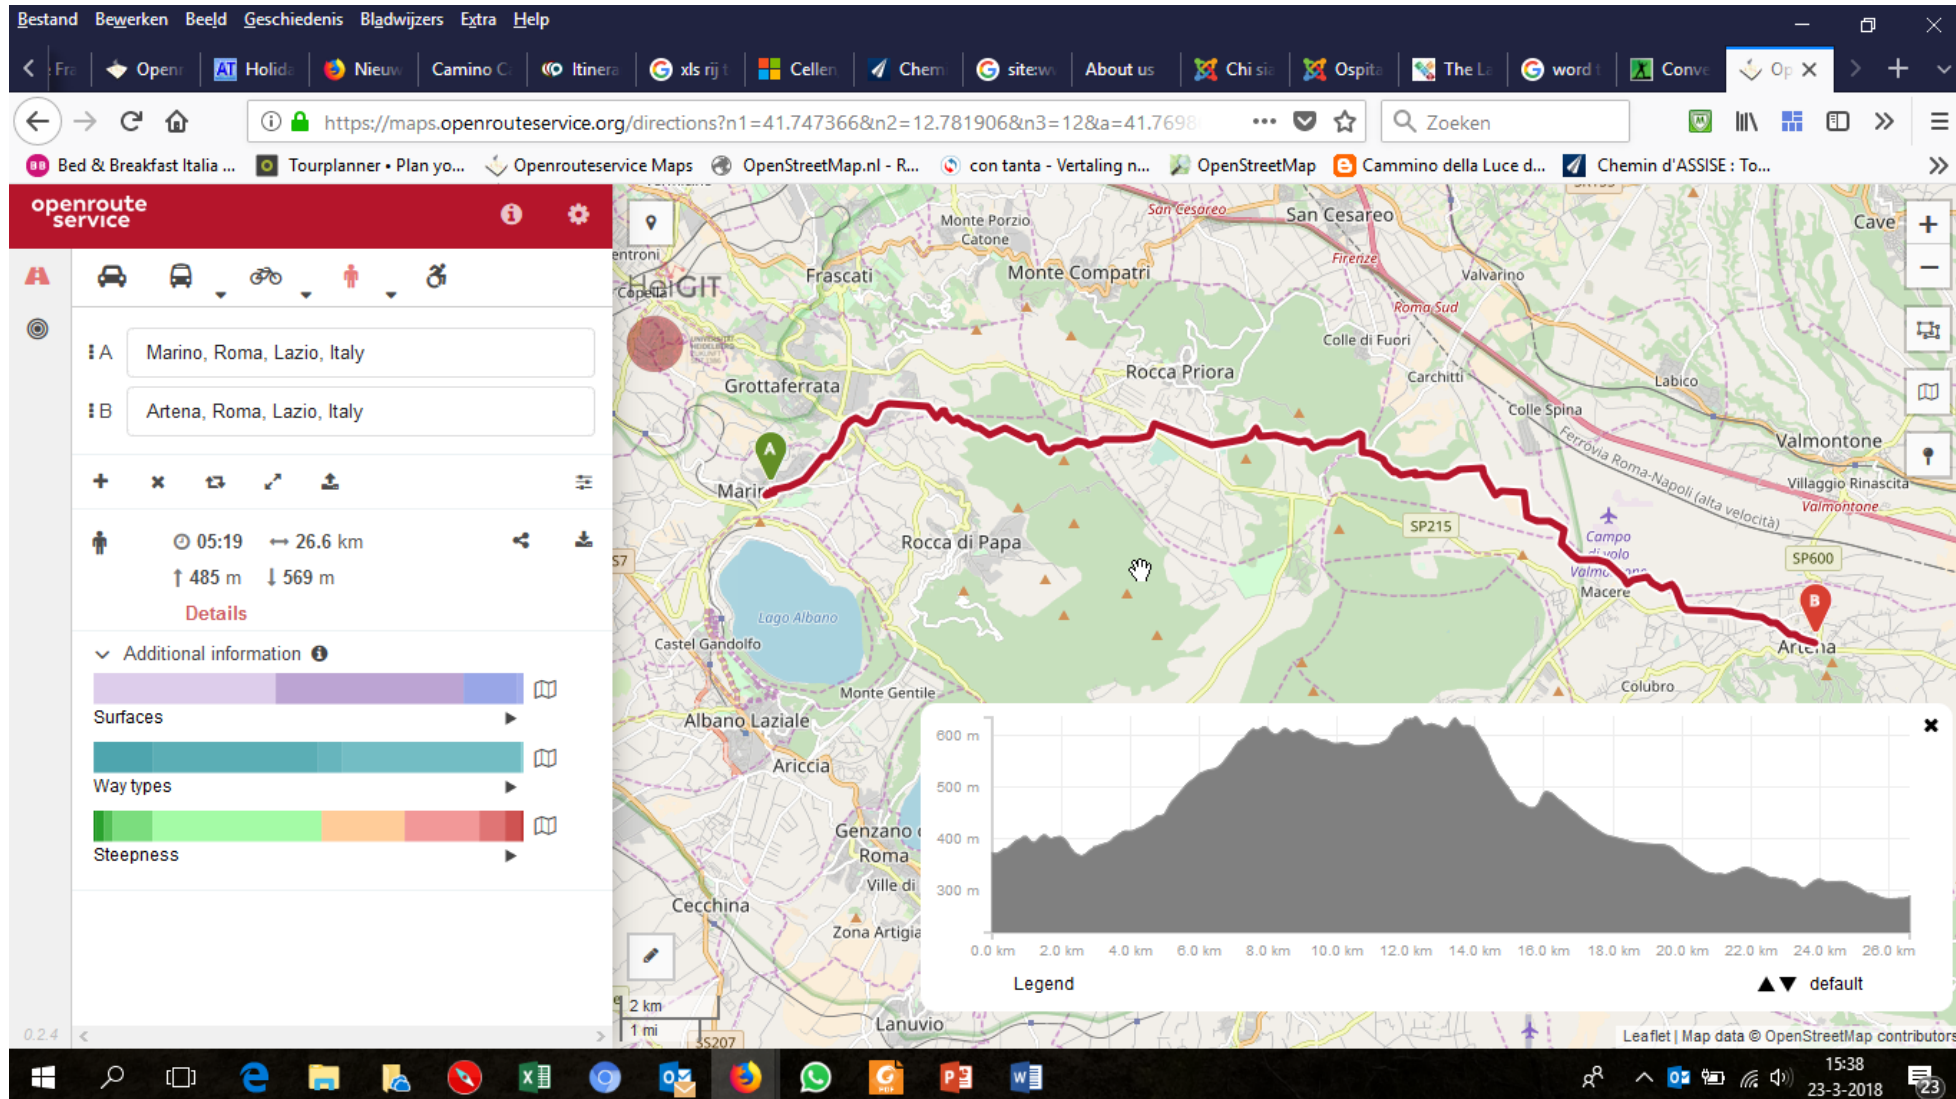

[More features](#) [Take a tour](#)

KML files kan je bekijken oa in Google Earth.

Goede routeplanner maakt gebruik van **nieuwe** openstreet maps :

<https://maps.openrouteservice.org> De site werkt ook goed op een android telefoon. **Openrouteservice** geeft een kortere wandelroute dan de NKBV App / Outdooractive App

Om zelf routes te plannen op je mobiele telefoon, kun je gebruik maken van:

Bergwandelen
Alpinisme
Sportklimmen

WEBSHOP | TOCHTENWIKI | FORUM | MARKTPLAATS | KENNISCENTRUM | M

BERGWANDELEN | ALPINISME | SPORTKLIMMEN | DE NKBV | LIDMAATSCHAP | VERZEKERING | CURSUS

Download de gratis Tochtenwiki-app

03 Juni 2015 15:31:44

Na de lancering afgelopen november van de online tochtenplanner NKBV-Tochtenwiki voor op je pc, is het nu ook mogelijk om de NKBV-Tochtenwiki-app gratis te downloaden voor **iphone** en **Android**.

Tochtenplanner

De Tochtenwiki is de online tochtenplanner van de NKBV met een ruim aanbod aan bestaande tochten voor zomer en winter. Deze worden dagelijks aangevuld met nieuwe tochten. Ook is het mogelijk eigen tochten te plannen door een start en eind-locatie op een interactieve kaart in te vullen.

Download nu

Dus ga je de bergen in om te bergwandelen, te mountainbiken, toerskiën, sneeuwschoenwandelen, een alpiene tocht te maken of heb je zin in een meerdaagse huttentocht? Het startpunt van iedere tocht in de Alpen zit vanaf nu ook in je smartphone. Download de app voor **iphone** en **Android**.

Voor fietsen kun je gebruiken (het is het zelfde programma, maar ook voor fietsers):

Op mijn Nokia lumia gebruik ik GPX viewer.

Op mijn android gebruik ik:

The screenshot shows the Google Play Store page for the app "GPX Viewer - Tracks, Routes & Waypoints" by Vectura Games OÜ. The app is categorized under "Travel & Local" and has a rating of 4.5 stars from 12,887 reviews. It is rated PEGI 3 and offers in-app purchases. A green "Install" button is visible. Below the main description, there are four preview images showing the app's interface: "Draw tracks, routes and waypoints from gpx, kml, kmz and loc files", "Show tracks and routes", "Track analysis", and a fourth partially visible image.

Track analysis

Ook Maps me is aantrekkelijk omdat men meerdere routes kan zichtbaar maken te gelijker tijd.

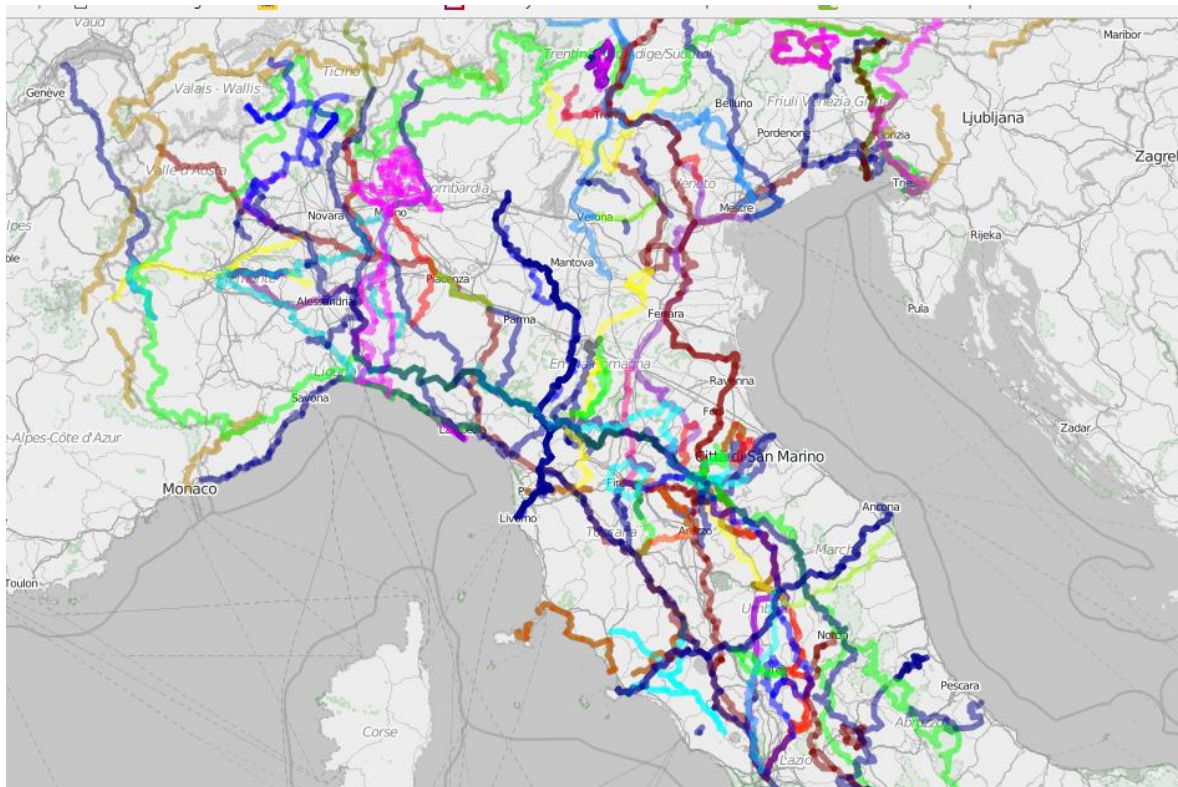

Werkt met KML bestanden. Kaarten zijn per land en provincie downloadbaar. Er is geen internet nodig voor gebruik.

The screenshot shows the Google Play Store page for the 'MAPS.ME – Map with Navigation and Directions' app. The app icon is a green circle with a white suitcase icon. The title 'MAPS.ME – Map with Navigation and Directions' is prominently displayed. Below the title, it says 'My.com B.V. Travel & Local' and shows a rating of 4.5 stars with 893,292 reviews. The app is rated 'PEGI 3' and 'Contains ads'. A note states 'This app is compatible with some of your devices.' There are buttons for 'Add to Wishlist' and 'Install'. Below the app information, there are three preview cards: 'FREE MAPS & NAVIGATION' (Offline, Worldwide, Fast), 'EXPLORE POINTS-OF-INTEREST' (Millions of objects on a highly detailed map), and 'NAVIGATE EASILY' (Create driving, walking and cycle routes). The bottom of the screen shows a Windows taskbar with various application icons.

Op UMAP vindt men oa:

Met Chrome heb ik de beste ervaring.

Routes in Portugal : <http://u.osmfr.org/m/190522/>

Routes in Spanje: <http://u.osmfr.org/m/190670/>

Routes in Spanje en
Portugal: <http://u.osmfr.org/m/190674/>

Routes in Noord Italië - Rome: 113 Routes
<http://u.osmfr.org/m/209572/> **ca. 280 MB**

Routes kan men ook vinden op:

- www.wikiloc.com
- www.Gpsies.com
- <https://hiking.waymarkedtrails.org> site: van EU
- <http://www.turismo.beniculturali.it/home-cammini-ditalia/> site: van Italiaanse overheid.
- <https://www.movimentolento.it/>
- www.xacobeo.fr

Slaapplaatsen:

<http://www.hospites.it/>
<http://www.viaggispirituali.it/strutture-turismo-religioso>
<https://www.ospitalitareligiosa.it/strutture>
<https://www.bed-and-breakfast.it/it/>

OP ONZE VERZAMEL LIJST vindt men ca. 1500 links van diverse routes in Italië

Deze lijst moet je beschouwen als het internet, al deze informatie vindt je niet door een simpele zoek opdracht. Je zult enkele vinden, maar niet zoveel over de zelfde route.

Dus zoek in deze lijst en bekijk desbetreffende sites.

Men kan ook kijken welke domeinen veel voorkomen en die bezoeken. En die sites bezoeken.

Of men bekijkt de routes die men niet van naam kent. De lijst en de Umap kaart dekken elkaar voor een deel niet.

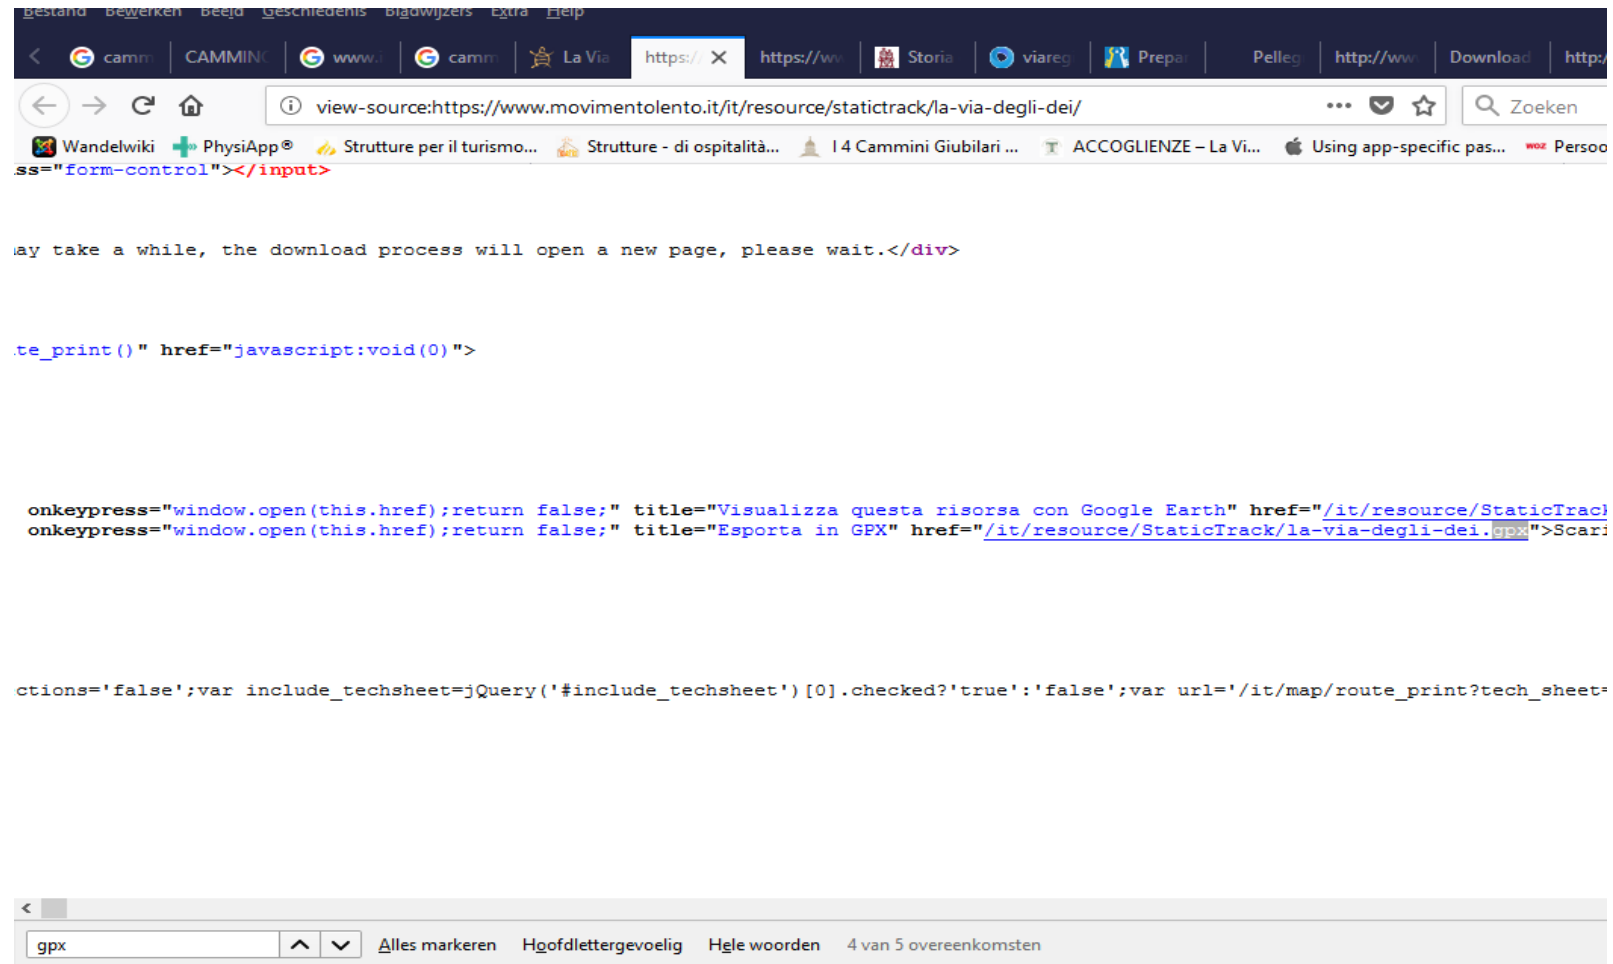

Dieper in een site gaan om gpx of kml locatie file op te zoeken. VB:

<https://www.movimentolento.it/it/resource/statictrack/la-via-degli-dei/>

The screenshot shows a web browser window with the address bar displaying <https://www.movimentolento.it/it/resource/statictrack/la-via-degli-dei/>. The website has a navigation menu with links: HOME, CHI SIAMO, ITINERARI, EVENTI, ARTICOLI, and CONTATTI. The main content area features a large photograph of a hiker on a rocky trail, labeled 'La Via degli Dei', and a map of the Emilia-Romagna region in Italy. The map shows a red line representing the hiking route from Bologna to Florence, passing through Prato and Fiesole. Below the map, there are tabs for 'Descrizione', 'Dati tecnici', 'Scarica mappe e tracce GPX', 'Risorse correlate', and 'Guida personalizzata'. The 'Descrizione' tab is active, showing text about the route: 'L'itinerario della Via degli Dei unisce in circa 130 km Bologna a Firenze, ripercorrendo un'antica viabilità storica utilizzata fin da epoca romana per unire la città di Felsina (Bologna) con Fiesole - Firenze. Ribattezzata "Flaminia Militare", è caratteristica per i selciati di origine etrusca che troviamo in diversi tratti del percorso. Per chi vuole percorrere tutto l'itinerario, si parte da Piazza Maggiore per salire a San Luca per poi seguire il lungo Reno fino a Sansepolcro'.

Klik op **pagina bron** in tap.

En ziet:

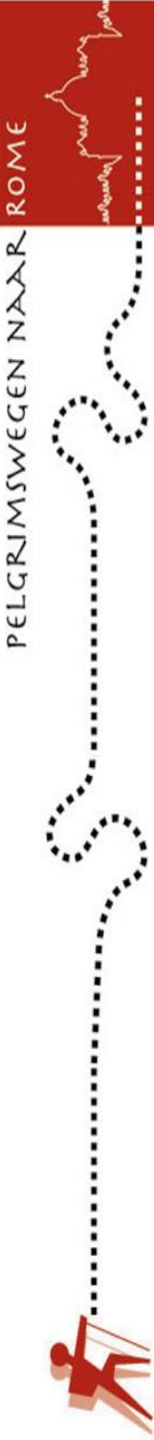

Zoek dmv **Ctrl F**

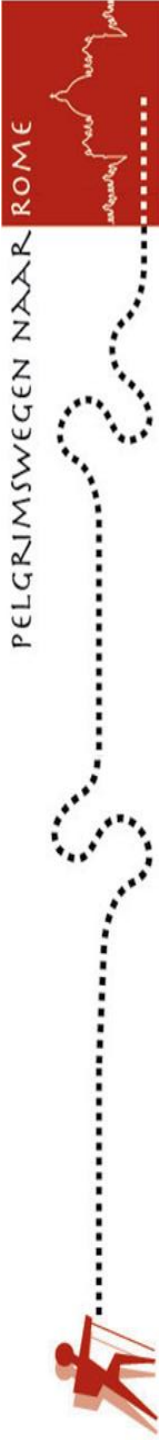

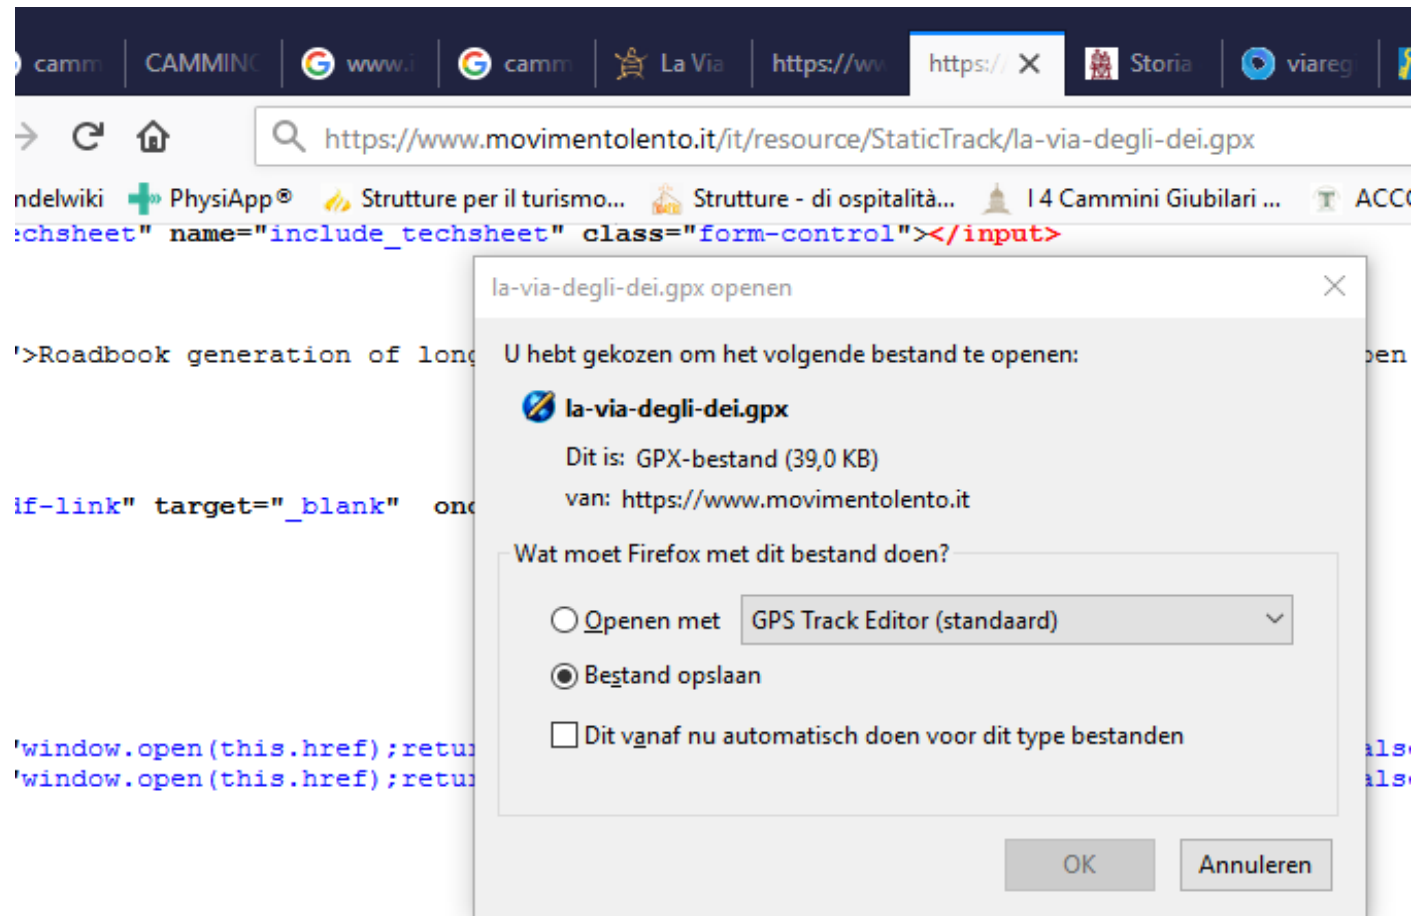

Men vindt </it/resource/StaticTrack/la-via-degli-dei.gpx>

Men plakt het domein : <https://www.movimentolento.it/>

Aan elkaar: <https://www.movimentolento.it/it/resource/StaticTrack/la-via-degli-dei.gpx>

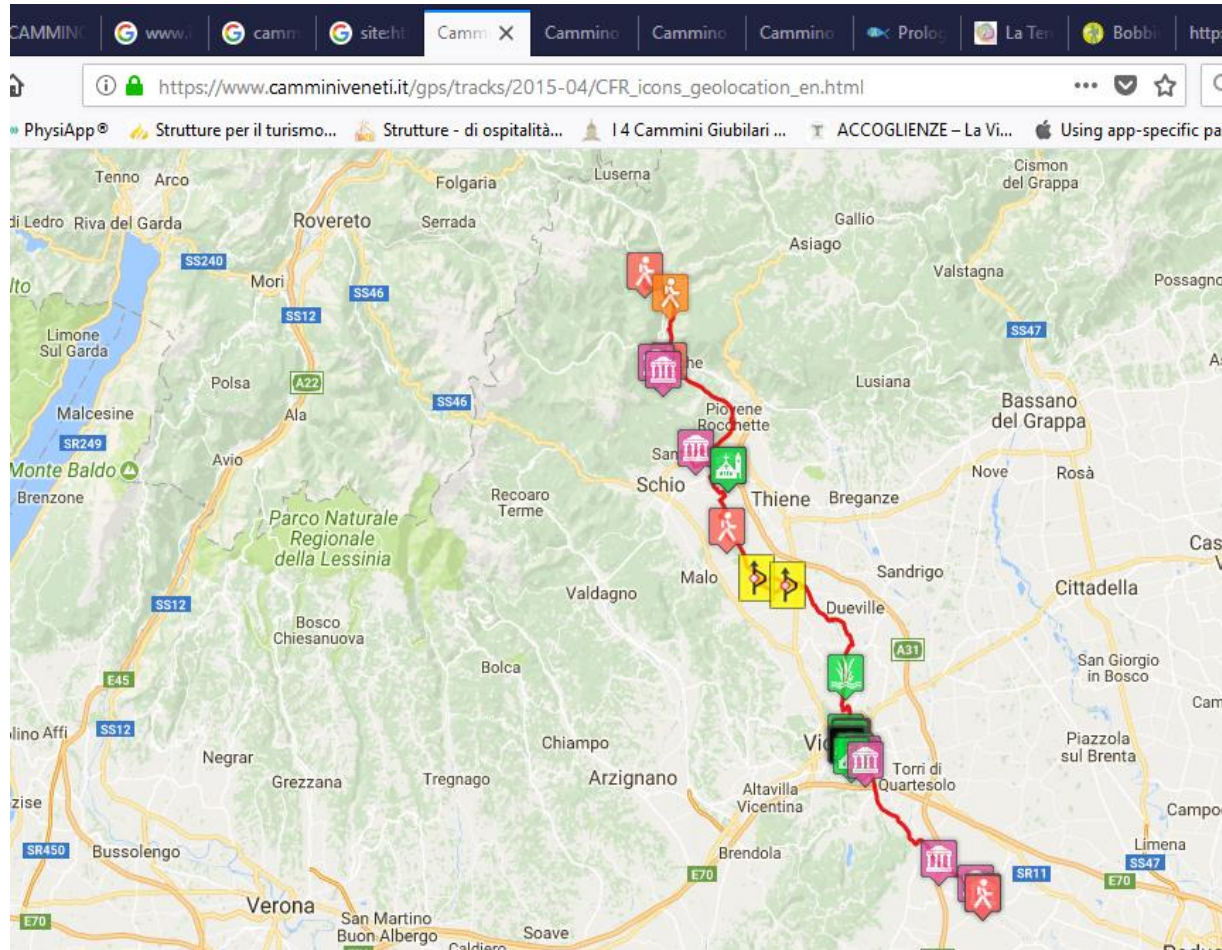

Zie hier resultaat:

Gpx of KML uit kaart van <http://www.gpsvisualizer.com/> halen.

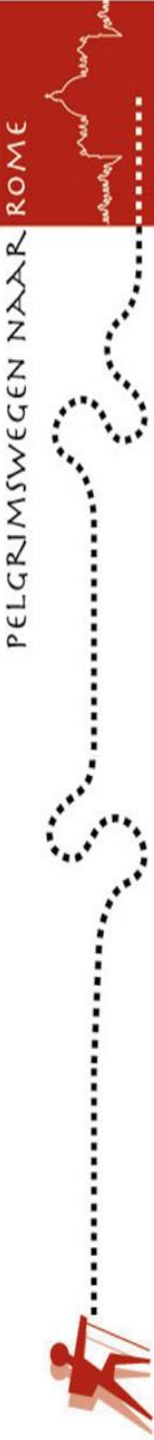

Op een normale manier kom je niet in de **Pagina bron**.

Maar wel als je:

view-source:https://www.camminiveneti.it/gps/tracks/2015-04/CFR_icons_geolocation_en.html

er voor zet. Kom je toch in.
